

## LISTING OF THE CLAIMS

This listing of claims replaces all prior versions of the claims in this application. Changes to the claims are indicated by strikethrough for deleted matter and by underlining for added matter.

### Listing of Claims

1.-13. (Canceled)

14. (Currently Amended) A catheter for delivering a biologically active material to a desired location of a body lumen of a patient comprising an expandable portion which is insertable or implantable into a body lumen, wherein the expandable portion is expandable in response to inflation pressure to fill the cross-section of the lumen and engage the tissue of the lumen and wherein the expandable portion comprises:

- a) a balloon having an outer surface;
- b) a membrane having a plurality of pores therein wherein the membrane comprises an outer surface and an inner surface, wherein the membrane is disposed about the balloon;
- c) ~~a reservoir disposed about~~ between the outer surface of the balloon, ~~wherein a first surface of the reservoir is defined by the outer surface of the balloon and a second surface of the reservoir is defined by~~ and the inner surface of the ~~a membrane having a plurality of pores therein, wherein the reservoir is capable of containing the biologically active material and wherein the reservoir is connected to a reservoir lumen for filling the reservoir with the biologically active material; and~~
- c) a biostable sponge coating disposed upon the outer surface of the membrane wherein the sponge coating is exposed to the body lumen when the catheter is inserted or implanted into the body lumen and, wherein the sponge coating comprises a non-hydrogel polymer having a plurality of voids and wherein the sponge coating is in fluid communication with the reservoir such that the biologically active material when present in the reservoir can pass through the pores of the membrane and enter the voids.

15. (Original) The catheter of claim 14 wherein the voids are formed by eluting a particulate material from the polymer.

16. (Previously presented) The catheter of claim 14, wherein the void space of the sponge coating is greater than about 60% of the volume of the sponge coating.

17. (Previously presented) The catheter of claim 14 further comprising an inflation lumen connected to the balloon.

18. (Canceled).

19. (Canceled).

20. (Original) The catheter of claim 14 wherein the polymer comprises an elastomer.

21. (Previously Presented) The catheter of claim 20 wherein the elastomer comprises a silicone, polyurethane, thermoplastic elastomer, ethylene vinyl acetate copolymer, polyolefin elastomer, or EPDM rubber.

22. (Previously Presented) The catheter of claim 14 wherein the biologically active material is heparin, paclitaxel, or rapamycin.

23. - 47. (Canceled)
